Electives for A.A. & A.S. Degrees
 All courses except: OXX-level courses; EARL221, 222

Notes:

*The Cisco Networking Academy Program courses must be taken in sequential order (as indicated).

- Mathematics Elective options: MATH 140, 145, 150, 160, 165, 175, 176, 180, 181, 202, 210, 211
- **Any CISC elective may be taken; but see an adviser for specific certification goals.**
- One course should be designated as Diversity and Global Awareness (D).
- Completion of BUSA 221G satisfies the Writing Intensive (WI) requirement.
- Electives: All courses except: OXX-level courses; EARL 221, EARL 222.

Program Narrative:

- As with the other Computer Information Technology degrees at Northampton, the first year of this program is designed to provide a strong foundation in basic PC applications, operating systems, and considerable microcomputer experience. In the second year of the program, you will focus on networking courses that teach you to repair, maintain, and administer state-of-the-art network hardware and operating systems along with the applications utilized by these systems.
- Upon completion of the Computer Information Technology Program-Networking Option, you will be prepared to gain employment as a PC and network systems technician, network technician, or network administrator. Graduates of the program will be prepared to pass the tests required to obtain the Cisco Certified Networking Associate (CCNA), Net+ Certification, NOVELL Certified Network Administrator (CNA) (if CISC 262 is taken), the A+ PC Support Certification, Microsoft MCP and/or MCSA certification, and the security and certification.
- Depending on your plans and available time, you can complete this program in two years of full-time study with day and evening classes, or in three years of part-time evening study.

Program Learning Outcomes:

- Gain fundamental and comprehensive understanding of the current field of computing upon which future growth within the field can be realized.
- Gain computer competencies necessary to compete in the business world.
- Use critical thinking to evaluate computing problems and explore options for their solutions.
- Use effective approaches for problem solving and data modeling.
- Gain experience in solving problems related to business computing and implementing these solutions.
- Develop awareness of the ethical concerns of computing professionals.
