GEOG 201 Physical Geology
PHYS 101 Physics I
PHYS151 Physics II
PHYS 152 Physical Science II
PHYS 215 Physics for Science and Engineering I
PHYS 225 Physics for Science and Engineering II

Program Narrative:

Northampton's Journalism, Media & Professional Writing Program provides the foundation for a career in the dynamic, digital world of the news media and professional communications in the 21st century. The major prepares students to transfer into a four-year degree program. The program emphasizes practical skills in reporting and writing for print and the web for students with no experience and provides those with some experience an opportunity to enhance their skills.

Students taking the journalism concentration in this major focus on reporting news of interest, relevance and usefulness to the college community, especially its students. This approach stresses "learning by doing," which means students will work in the field covering issues, trends and events at the school, as well as those outside the school that affect the NCC community.

Graduates with reporting and writing skills and a baccalaureate degree can expect to begin their careers at regional newspapers, web publications or other news outlets, as well as public relations firms, corporate communications offices, or other employers who rely on communications specialists.

Program Learning Outcomes: Graduates will be able to:

Be critically aware of the roles, legal rights and ethical responsibilities of journalists in a multicultural society.

Demonstrate responsible news judgment that serves the needs of a multicultural audience.

Demonstrate ability to edit copy for appropriate, correct English and Associated Press (AP) style.

Demonstrate ability to write interesting headlines and captions fitting an article or photograph.

Demonstrate ability to gather material and create news content for print and the web.

Be able to use various narrative techniques in creating news content for print and the web.

Demonstrate understanding of the basic operation of desktop and web publishing tools.

Be able to use social media, search engine optimization and content aggregation to reach and build an intended audience.

Transfer Information:

Students planning to continue their studies at a four-year school typically transfer to such nearby institutions as Temple, Kutztown and East Stroudsburg universities, which they should begin to consider by the completion of their first year at NCC. Other in-state universities that have attracted students in this major include Lehigh, Penn State and Pittsburgh.

Career Information:

Students graduating from a four-year school might expect to find employment at weekly and daily newspapers, web publications, public relations firms, including those in the corporate and nonprofit sectors.
