Electives for AAS Degrees
All courses except: OXX-level courses; EARL221, 222

Program Narrative:

- Accountants are essential team members within large and small businesses, and at non-profits and educational institutions. With a degree in accounting, you will also have the knowledge you need to manage your own business. Northampton's Accounting program, which is accredited by the Accreditation Council for Business Schools and Programs (ACBSP), provides a solid foundation of specific accounting concepts as well as the skills you will need to succeed in the field.
- There are several different options that students can pursue in the Accounting program at Northampton, including the Associate in Applied Science (AAS) or one of two Specialized Diplomas. On its own, Northampton's associate degree will qualify you for a range of employment opportunities, including entry-level accounting, bookkeeping, accounts payable or accounts receivable clerks and more. If your path is to pursue a career as a Certified Public Accountant (CPA) or Certified Management Accountant (CMA), an associate degree from Northampton is an affordable way to start down the path toward the required further education requirement.
- The AAS degree program can be conveniently completed in the day or evening, on a full- or part-time basis. The program can be completed at both the Bethlehem and Monroe campuses and can also be completed online.

Program Learning Outcomes: Graduates of the program will be able to:

- Make decisions that reflect legal and ethical standards in the profession of accounting.
- Prepare financial reports and statements.
- Interpret financial data and financial information.
- Analyze accounting data and information for decision making.

Transfer Information:

The Accounting Associate in Applied Science is not intended to be a transfer program. If a student is interested in earning a bachelor's degree in Accounting, it is advised that the student enroll in the Business Administration (Associate in Arts) program at Northampton.
