

Gunshot and Shotgun Crime / Death Scene Investigations

This course will discuss awareness information and procedures related to recognition and preservation of crime scenes. Participants will be able to relate the application of procedures and responsibilities to the various types of firearms and ammunition used in crime/death scenes. Topics include: proper documentation, firearm identification and familiarization, ammunition identification and familiarization, proper packaging of evidence, internal, terminal and external ballistics, trajectory and sequencing in glass, and trajectory analysis documentation. Two practical lab sessions will be held, to reinforce the course discussion topics followed by a review and discussion. Participants should expect some graphic images of actual crime scenes as part of the course information.

Course code: FRNSC135

Instructors: Ben lobst, Joe Koury
